DETAILED ACTION

1. Claims 1-31 are pending in this office action.
2. Applicant's arguments, filed January 23, 2007, have been considered and are persuasive.

Allowable Subject Matter

3. Claims 1-31 are allowed.
4. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach a transaction authorization token, that is issued to the user while online, and is uploaded with an offline transaction object, wherein an online validation service verifies the uploaded data while the user is offline. The transaction authorization token enable the validation service to authenticate the user and authorize secure transactions, all while the user is offline from the validation service.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

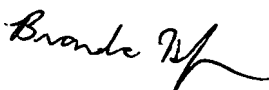

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Davis et al. (U.S. Patent No. 6,282,522) discloses a token that is

obtained online for a value (\$10) and can be transferred and used to make purchases for items. The token must be redeemed and validated while online, which is different than the instant application of verifying while the user is offline.
